***The Maine Museum of Contemporary Photography New Special Program Focus***

***Mission***

The Maine Museum of Film and Photography preserves and promotes Maine's vital contribution to the art of making images, both moving and still.

We support a thriving community of local photographers, filmmakers, writers, designers and production artists working behind the lens to document, explore, express and create in a uniquely dynamic medium. We celebrate their strong sense of place and the worldwide range of their vision. We encourage residents, visitors and friends of Maine to engage with this work and let it work on them—challenging perceptions, raising awareness and providing new perspectives.

Maine is renowned for its scenery, but MMFP demands that Maine truly be *seen*.

***Strategic Plan***

1. To acquire, curate and conserve a permanent collection of photography and film with roots in the state of Maine.
  2. To house this collection in an attractive and accessible location for the general public, and to translate this collection to a digital format and the web.
  3. To reach out to other organizations working in education, the arts and the environment to combine forces, maximize resources and avoid duplicating or conflicting efforts.
  4. To take advantage of cutting edge technologies for communication, presentation and preservation.
  5. To provide educational programming suitable for a wide range of audiences.
  6. To convene a Board of Trustees to oversee the physical and financial assets of MMFP.
  7. To establish paid positions to advance MMFP's interests and growth by fundraising, marketing, securing and curating work and managing day-to-day operations.
